

MUYUN PORCELAIN

Flexible Porcelain Tableware Supply Partner from Chaozhou, China

1. Company Introduction

MUYUN PORCELAIN is a flexible porcelain tableware supplier based in Chaozhou, China.

We are not only a single-category factory. We integrate different high-quality ceramic resources and support customers with product selection, craft development, packaging solutions and order execution.

Our main value is flexibility.

We help customers start new porcelain tableware projects with lower risk, lower MOQ and more practical market experience.

We work with importers, wholesalers, brands, retail customers, hospitality suppliers, supermarkets, gift companies and e-commerce customers from different markets.

When a customer wants to start a new tableware project, we do not only offer prices. We can also help check the product direction, craft options, MOQ, packaging solution, lead time and market fit.

Our goal is to make the project clearer, easier and safer from the beginning.

2. What We Supply

MUYUN supports different porcelain tableware products and customized projects, including:

1. White porcelain tableware
2. Color glaze tableware
3. Reactive glaze tableware
4. Decal tableware
5. Daily tableware
6. Hotel and restaurant tableware
7. Retail collections
8. Gift sets
9. Coffee and tea series
10. Customized tableware projects

Customers can choose from our available stock items, existing shapes, market-tested designs or develop new items based on their own market needs.

By Use

1. Daily tableware
2. Hotel and restaurant tableware
3. Gift sets
4. Retail collections
5. Promotion items
6. Coffee and tea series
7. E-commerce packing projects

4. MOQ Rules

MUYUN supports flexible MOQ.

Our MOQ depends on the product, stock status, mold, craft, decoration and order details.

For stock items, we have more than 2,000 available products in our warehouse, and the MOQ can be as low as 100 pcs.

For existing molds without ready stock, the MOQ is usually 500–1,000 pcs.

For stoneware products, the regular MOQ is usually 500 pcs per item.

For existing shapes with logo, we can support from 100 pcs. The logo can be added on the bottom, mug body or plate surface.

For color glaze, the MOQ is usually 500–1,000 pcs per color. Special glaze usually requires 1,000 pcs.

For decal designs, if we use stock items, the MOQ follows the MOQ of the ceramic item itself. If the item is not in stock and the design is complicated, the MOQ is usually 1,000 pcs.

For new mold development, the MOQ is usually 500–1,000 pcs. The mold cost is around USD 200 per shape, and the sample lead time is around 15 days.

MOQ can be discussed case by case for trial orders, repeat orders and long-term projects.

5. Logo and Custom Design

We can support logo customization on:

1. Bottom
2. Mug body
3. Plate surface

For existing shapes, logo customization can start from 100 pcs.

Customers are suggested to provide AI files for logo or pattern customization.

If customers do not have complete artwork, MUYUN can also provide design support. The design service fee can be confirmed separately.

We can also develop custom patterns based on customer artwork, photos, samples or market direction.

6. Shape Development

MUYUN can support new shape development.

Customers can provide:

1. Photos from different angles
2. Drawings
3. Physical samples

For regular mugs, plates, bowls and other common tableware shapes, we can check the mold possibility based on photos and dimensions.

The mold cost is around USD 200 per shape.

The mold sample lead time is usually around 15 days.

After the master mold is confirmed, stable mass production can be arranged.

7. Color and Glaze Development

We can support color glaze customization based on Pantone reference.

Because ceramic products are fired at high temperature, slight color variation may happen between samples and mass production or between different batches.

We usually provide color samples for customer approval before mass production.

For reactive glaze, natural color variation is part of the craft effect. Each piece may look slightly different, which makes the product more natural and unique.

8. Packaging Capability

MUYUN can support different packaging solutions for different sales channels.

Standard Export Packing

1. White box
2. Kraft box
3. Master carton
4. Egg divider
5. Bubble bag
6. Pallet packing

Retail Packing

1. Color box
2. Gift box
3. Window box
4. Set box
5. Hang tag
6. Barcode sticker

E-commerce Packing

1. Mail-order packing
2. Stronger protective packing
3. Individual box packing
4. Drop test support if required

Supermarket Packing

1. Display box
2. PDQ
3. Shelf-ready packaging
4. Pallet display

Eco-friendly Packing

1. FSC paper
2. Plastic-free packing
3. Recyclable materials
4. Paper pulp tray

For customized packaging, customers can provide dieline, AI design file, barcode, shipping mark, warning text, importer information and target market requirements.

If customers do not have a packing solution, we can suggest suitable options based on product size, sales channel and market needs.

9. Certification and Testing Support

MUYUN can provide existing test reports for customer reference and cooperate with different market testing requirements.

We can support food contact safety testing, including:

1. FDA
2. LFGB
3. GB 4806.4
4. Lead-free testing
5. Cadmium-free testing

Our products can support common usage requirements such as:

1. Dishwasher safe
2. Microwave safe
3. Oven safe

For different markets, we can also cooperate with documents or testing requirements such as CE, UKCA, EU market documents and UK market documents if required.

For packaging, we can support FSC paper, recyclable packaging and plastic-free packaging solutions.

If customers need a new test report under their own company name or for a specific item, we can help arrange the testing process. The testing cost and lead time need to be confirmed based on the required standard.

10. Lead Time

The production lead time starts after all order details are confirmed, including deposit received, PI confirmed, artwork confirmed, sample approved and packing confirmed.

Sample Lead Time

1. Stock sample: around 2 days to send out
2. Logo sample: around 7 days
3. New mold sample: around 15 days
4. Color sample: around 15 days

Mass Production Lead Time

1. Regular order: around 60 days
2. Repeat order: around 55 days
3. Complicated craft: around 75 days

4. Complicated packing: around 10 extra days

For orders with new mold, special glaze, complicated decoration, customized packaging or third-party testing, the lead time should be checked based on the final order details.

Lead time may be affected during peak seasons, such as before and after Chinese New Year, after Canton Fair and during the year-end shipping peak.

11. Payment Terms

Our standard payment term is T/T:

30% deposit before production, and 70% balance against B/L copy.

For sample mold development, the cost is around USD 200 per item.

For sample delivery, customers can provide their courier account, or the courier cost can be paid by the customer.

If the customer places an order and reaches the MOQ for this item, the sample cost can be deducted from the order amount.

For new mold development, the mold cost will be confirmed based on the item. If the customer places an order and reaches the MOQ for this item, the mold cost can be refunded or deducted from the order amount.

For customized packaging, packing sample cost, design fee or printing plate fee may apply, depending on the packing requirement.

Special payment terms can be discussed case by case for stable repeat customers or large projects.

12. Why Work with MUYUN

MUYUN is suitable for customers who want:

1. Lower MOQ to test the market
2. More product options
3. Flexible customization
4. Fast sample development
5. Practical suggestions before starting a new project
6. Packaging support for different sales channels
7. Reliable order execution
8. Long-term tableware supply support

We help customers start porcelain tableware projects with lower risk, lower MOQ and more practical market experience.

13. Short Version for Email or Website
